

Algebra II H Syllabus 2025-2026

Franklin High School

Teacher Information

Mr. Rice Email: ricej@franklinps.net

Course Description

Algebra II Honors extends and further explores topics previously developed in Algebra I and Geometry. Additional topics covered include the complex number system, polynomials, rational functions, radicals, trigonometry, logarithms, and probability. Students explore and analyze mathematics algebraically, numerically, and graphically. To be successful in this course, students must have a strong algebraic foundation and fluency in algebraic vocabulary and notation. Students also need fluency with number facts and operations and a commitment to work effectively both in and out of class. Students are expected to make use of and build fluency with technologies such as graphing calculators, Geogebra, Desmos, and Google applications. Technological fluency will be assessed throughout the course.

Course Content

- Unit 1 - Parent Functions & Transformations
- Unit 2 - Quadratic Functions
- Unit 3 - Quadratic Equations & Complex Numbers
- Unit 4 - Polynomial Functions
- Unit 5 - Rational Functions
- Unit 6 - Rational Exponents & Radical Functions
- Unit 7 - Exponential & Logarithmic Functions
- Unit 8 - Compositions & Transformations of Functions
- Unit 9 - Trigonometry
- Unit 10 - Probability

Standards for Mathematical Practice

- ★ Make sense of problems and persevere in solving them.
- ★ Reason abstractly and quantitatively.
- ★ Construct viable arguments and critique the reasoning of others.
- ★ Model with mathematics.
- ★ Use appropriate tools strategically.
- ★ Attend to precision.
- ★ Look for and make use of structure.
- ★ Look for and express regularity in repeated reasoning.

Resources

- **Google Classroom**
- **Big Ideas Math Algebra II** - Students interested in receiving a book for the year should let me know
- **[Delta Math](#)** - Students login using their FHS email & password.

Required Materials

- **[Class Notes Notebook](#)** - used daily to keep a record of lessons, examples, & key concepts.
- **Homework Notebook** - keep homework assignments separate & organized for easier review & submission.
- **Writing Materials** - pencils, erasers, colored pencils, colored highlighters, etc.
- A **folder** specifically for this class
- **TI-83 or TI-84 Graphing Calculator** OR Desmos Lockdown Browser (you **MUST** have a school Chromebook)

Homework

- **Practicing the skills we learn is vital to learn and retain content!**
- You will be assigned nightly homework that should take you 20-30 minutes.
- Homework can be checked, graded, and/or collected at any time. *There will be homework quizzes.*
- Homework will be problems assigned from our textbook or on Delta Math.

Extra Help

- Academic Learning Center (ALC)
- WIN Block
- After school by appointment

Grading

- **Quarter grades** will be determined by total points earned divided by total points possible.
 - Your grade = $\frac{\text{Total points you earn}}{\text{Total points possible}} \cdot 100\%$
- Quarter grades include assignments: classwork, homework, quizzes, assessments, & projects, etc.
- **Transcript Grade:** 90% Average of the Four Quarters & 10% Cumulative Final Exam
 - The end-of-year final exam will be cumulative. The final exam will consist of all topics covered.

Late Policy

- Assignments submitted after the deadline will incur a penalty of 10% per day late. This deduction applies for each school day past the due date, up to a maximum of 5 days, after which the assignment may no longer be accepted unless prior arrangements have been made. Please plan accordingly and reach out early if you anticipate any issues.

Make Up Policy

- If you are absent...
 - Check Google Classroom & take any missed notes.
 - Attempt homework.
 - See me with any questions you have about the content and/or stay after school, if needed.
 - When you return to class, check the absent work folder.
- If you are absent for an assessment, be prepared to take the assessment during ***the next class***.

Electronics (Phones, Headphones, etc.) Policy

- Electronics are not permitted during class time. Must remain in the phone chart. Please refer to the school phone (electronics) policy for permitted use as well as appropriate intervention(s) when noncompliant.

Academic Honesty

- My expectation is that any assignment you hand in to me is your own mathematical thoughts, ideas, and work. Any violation of this expectation will result in a conduct referral to your assistant principal and further actions may be taken.

This year's theme: *"Leave it better than you found it"*

Classroom Norms & Expectations

- Be prompt, prepared, and productive
- Be active and engaged
- Be respectful of yourself, classmates, and teacher
- Be proud, and present only your work
- When using Chromebooks, it should only be used for this class.
- *Independently* track your grades through ASPEN.
- *Independently* keep on top of your work through Google Classroom.
- Foster a safe and engaging learning environment
- Respect & listen to questions and comments in order to improve your learning experience
- Work with students to build knowledge of the curriculum as well as grow as a learner
- Take risks and embrace mistakes, viewing them as an opportunity to grow and learn as a person
- Support all students as learners and individual
